Site Assessment Team

US EPA RECORDS CENTER REGION 5

399062

A review of the Illinois EPA file information has revealed the only State enforcement/involvement at Roadway Trucking in Chicago Heights is by the LUST program.

The most recent information indicated that the LUST Unit has requested Roadway to conduct a comprehensive soil and groundwater investigation of the facility and prepare a corrective action plan and budget for responding to all environmental concerns at the site. This information was taken from a June 1993 letter from IEPA to Roadway Express. Attached is a copy of that letter.

According to Bur Filson of IEPA's Leaking Underground Storage Tank Section, there may have been some work done by Roadway since the time of the letter but he is unsure. The problem he sees is that some of the contamination which has been detected is coming from non-UST related activities. There is someone currently involved with the site from the LUST Unit.

This is the only information that I have been able to find concerning the State's involvement in the Roadway Trucking site. If you need anything further please notify me at 217-524-1663.

Sincerely,

Bruce Everetts
